

# What kind of racers demand MaxSea? Winners!

**MAXSEA**

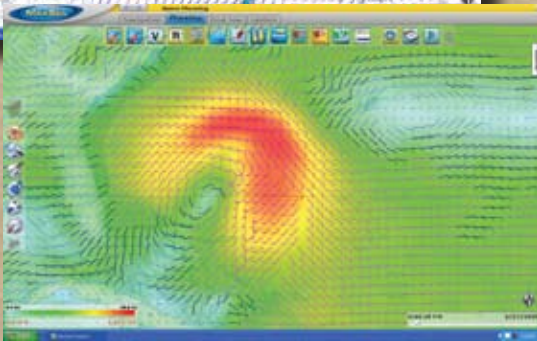

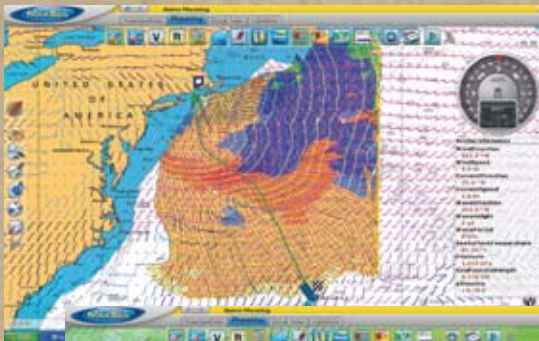

**TIME ZERO**

**WINNER - VENDEE GLOBE**  
**WINNER - MARION TO BERMUDA OCEAN RACE**  
**WINNER - MELBOURNE OSAKA CUP 2007**

With over 35,000 installations of MaxSea worldwide, and more first place finishes under our belt than the competition, we know how to get you to the finish line fast. The new MaxSea TimeZero navigation software allows you to plan and forecast, accounting for all of the critical variables that help you plot the ideal course.

The optional Sail Routing Module makes it easy to calculate the optimal route based on the weather parameters you select.

- One click comparison between several routes and animations to evaluate multiple scenarios
- Option to pass a waypoint, leaving it Port or Starboard during multi waypoint routing computation
- Waves are used for routing computation along with wind and currents
- Display "Sailsets" polars in convenient color coding on the routing isochrones, indicating the points for sail changes
- Exclusive TimeZero technology facilitates 3D rendering of official nautical charts and satellite photos
- Interface directly to NavNet 3D with TimeZero Explorer
